

Haoliang Wang

Department of Psychology, UC San Diego, La Jolla, CA 92093 U.S.A.

email: haw027@ucsd.edu, URL: <https://haoliangwang.github.io>, phone: +1 (858) 214-9401

Education

- 2019- *PhD*, Experimental Psychology, UC San Diego
 Advisors: Judith E. Fan, Nadia Polikarpova
- 2019-2021 *MA*, Experimental Psychology, UC San Diego
 Advisor: Judith E. Fan
- 2015-2019 *BE*, Automation, Xi'an Jiaotong University
 Advisor: Pengju Ren
 Thesis: Spiking neural network learning algorithms based on temporal modulation.

Selected Academic Honors

- 2018 PengKang Scholarship (top 1% students for academic excellence).
- 2017 Samsung Scholarship (top 2% students for academic excellence).
 The First Prize of Alumni Scholarship of Xi'an Jiaotong University (top 2% student for academic excellence).
- 2016 Outstanding Students in Xi'an Jiaotong University (top 5% students for academic excellence).
 The First Prize of Contemporary Undergraduate Mathematical Contest in Modeling (CUMCM).

Research Interests

Computational Cognitive Science: intuitive physics, theory acquisition, concept learning
Machine Learning: program synthesis, representation learning, neural-symbolic models

Publications

- 2021 **Wang, H.**, Polikarpova, N., and Fan, J. (2021). Learning part-based abstractions for visual object concepts. *Proceedings of the 43rd Annual Meeting of the Cognitive Science Society*.
- 2021 **Wang, H.**, Vul, E., Polikarpova, N., and Fan, J. (2021). Theory acquisition as constraint-based program synthesis. *Proceedings of the 43rd Annual Meeting of the Cognitive Science Society*.
- 2021 McCarthy*, W., Hawkins*, R., **Wang, H.**, Holdaway, C., and Fan, J. (2021). Learning to communicate about shared procedural abstractions. *Proceedings of the 43rd Annual Meeting of the Cognitive Science Society*.
- 2020 **Wang, H.**, and Fan, J. (2020). Library learning for structured object concepts. *ICML Workshop on Object-Oriented Learning: Perception, Representation, and Reasoning*.

Conference Presentations

- 2021 Learning to communicate about shared procedural abstractions: Talk presented at *43rd Annual Meeting of the Cognitive Science Society*.
- 2021 Learning part-based abstractions for visual object concepts: Poster presented at *43rd Annual Meeting of the Cognitive Science Society*.
- 2021 Theory acquisition as constraint-based program synthesis: Poster presented at *43rd Annual Meeting of the Cognitive Science Society*.
- 2020 Library learning for structured object concepts: Poster presented at *ICML Workshop on Object-Oriented Learning: Perception, Representation, and Reasoning*.

Teaching Experience

UC San Diego, Department of Psychology

- 2021 PSYCH 105 Cognitive Psychology
PSYCH 104 Social Psychology
- 2020 PSYCH 3 Foundations of Cognitive Psychology
- 2019 PSYCH 100 Clinical Psychology
- Responsibilities: Guest lecture a class session, assist with exam preparation and teaching, grade written assignments, and hold weekly office hours.*

Outreach

- 2021 Gave a talk on Bayesian reasoning and program synthesis to high school students in [Pathways2AI](#).

Research Experience

2019- UC San Diego, Cognitive Tools Lab

Graduate Student (Principal Investigator: Judith E. Fan)

- Developed web-based experiments where participants infer alien physics dynamics.
- Developed an algorithm for learning part-based structures of visual concepts represented as graphics programs; designed an efficient algorithm for learning latent physics theories from observations by augmenting traditional program synthesis techniques with constraints.

2018 MIT, Computational Cognitive Science Group

Research Assistant (Principal Investigator: Josh Tenenbaum)

- Studied the impact of stimulus strength on the speed and accuracy of perceptual decisions.
- Adopted both drift-diffusion model (DDM) and POMDP to explain reaction time in human's decision making and planning behavior in mazes under uncertainty.

2018 UC Los Angeles, Center for Vision, Cognition, Learning, and Autonomy

Research Assistant (Principal Investigator: Song-Chun Zhu)

- Collected a large-scale dataset from Grand Theft Auto (GTA), annotated with rich information including 3D mesh for dynamic environment, human skeleton and pose.
- Developed an EM-like algorithm to learn both the structure and the parameters of a probabilistic context-free grammar (PCFG) that models human-object interaction in the dataset.

2017

The Chinese University of Hong Kong, Multimedia Laboratory

Research Assistant (Principal Investigator: Dahua Lin)

- Collected a new sketch-photo dataset containing over 8k sketch-photo face pairs.
- Developed an ANN model for mapping examples in a weak modality (sketch) to examples in a stronger modality (photo) by inferring the conditional distribution of a semantic representation in the strong modality given an example from the weak modality using GANs.

2017

Chinese Academy of Sciences, Institute of Artificial Intelligence and Robotics

Research Assistant (Principal Investigator: Ran He)

- Investigated the role of identity-preserving transformation in cross-modality face retrieval.
- Designed and implemented a human-like Artificial Neural Network (ANN) architecture where a global encoder-decoder network and four local patch networks work jointly to perceive both global structures and local details of faces.

Skills

Modelling and Analysis: Python, PyTorch, Julia, Gen, R, MATLAB, C++

Experimental Design: JavaScript, HTML, CSS

Software and Tools: git, Adobe CC, \LaTeX

Last updated: September 21, 2021 • Typeset in $\text{\texttt{Xe}\LaTeX}$
