Haoliang Wang

Department of Psychology, UC San Diego, La Jolla, CA 92093 U.S.A.

email: hawo27@ucsd.edu, URL: https://haoliangwang.github.io

Education

2019- PhD, Experimental Psychology, UC San Diego

Advisors: Judith E. Fan

2019-2021 MA, Experimental Psychology, UC San Diego

Advisors: Judith E. Fan

2015-2019 BS, Computer Science, Xi'an Jiaotong University

Advisor: Pengju Ren

Thesis: Spiking neural network learning algorithms based on temporal modulation.

Selected Academic Honors

2018 PengKang Scholarship (top 1% students for academic excellence).

Samsung Scholarship (top 2% students for academic excellence).

The First Prize of Alumni Scholarship of Xi'an Jiaotong University (top 2% student for aca-

demic excellence).

Outstanding Students in Xi'an Jiaotong University (top 5% students for academic excellence).

The First Prize of Contemporary Undergraduate Mathematical Contest in Modeling (CUMCM).

Research Interests

Computational Cognitive Science: intuitive physics, theory acquisition, concept learning **Machine Learning**: program synthesis, representation learning, neural-symbolic models

Publications

* indicates equal contribution

Wang, H., Polikarpova, N., and Fan, J. (2021). Learning part-based abstractions for visual

object concepts. Proceedings of the 43rd Annual Meeting of the Cognitive Science Society.

Wang, H., Vul, E., Polikarpova, N., and Fan, J. (2021). Theory acquisition as constraint-based program synthesis. *Proceedings of the 43rd Annual Meeting of the Cognitive Science Society.*

McCarthy*, W., Hawkins*, R., Wang, H., Holdaway, C., and Fan, J. (2021). Learning to com-

municate about shared procedural abstractions. Proceedings of the 43rd Annual Meeting of the

Cognitive Science Society.

2020

2021

2021

2021

Wang, H., and Fan, J. (2020). Library learning for structured object concepts. *ICML Workshop on Object-Oriented Learning: Perception, Representation, and Reasoning.*

Conference Presentations

Learning to communicate about shared procedural abstractions: Talk presented at 43rd Annual Meeting of the Cognitive Science Society.

Learning part-based abstractions for visual object concepts: Poster presented at 43rd Annual Meeting of the Cognitive Science Society.

Theory acquisition as constraint-based program synthesis: Poster presented at 43rd Annual Meeting of the Cognitive Science Society.

Library learning for structured object concepts: Poster presented at *ICML Workshop on Object-Oriented Learning: Perception, Representation, and Reasoning.*

Teaching Experience

UC San Diego, Department of Psychology

PSYCH 105 Cognitive Psychology

PSYCH 104 Social Psychology

PSYCH 3 Foundations of Cognitive Psychology

PSYCH 100 Clinical Psychology

2021

2021

2020

2021

2020

2018

2018

Responsibilities: Guest lecture a class session, assist with exam preparation and teaching, grade written assignments, and hold weekly office hours.

Research Experience

2019- UC San Diego, Cognitive Tools Lab

Graduate Student (Principal Investigator: Judith E. Fan)

- · Developed web-based experiments where participants infer alien physics dynamics.
- · Developed an algorithm for learning part-based structures of visual concepts represented as graphics programs; designed an efficient algorithm for learning latent physics theories from observations by augmenting traditional program synthesis techniques with constraints.

MIT, Computational Cognitive Science Group

Research Assistant (Principal Investigator: Josh Tenenbaum)

- · Studied the impact of stimulus strength on the speed and accuracy of perceptual decisions.
- · Adopted both drift-diffusion model (DDM) and POMDP to explain reaction time in human's decision making and planning behavior in mazes under uncertainty.

UC Los Angeles, Center for Vision, Cognition, Learning, and Autonomy

Research Assistant (Principal Investigator: Song-Chun Zhu)

- · Collected a large-scale dataset from Grand Theft Auto (GTA), annotated with rich information including 3D mesh for dynamic environment, human skeleton and pose.
- · Developed an EM-like algorithm to learn both the structure and the parameters of a probabilistic context-free grammar (PCFG) that models human-object interaction in the dataset.
- · Manuascript can be found here.

The Chinese University of Hong Kong, Multimedia Laboratory

Research Assistant (Principal Investigator: Dahua Lin)

- · Collected a new sketch-photo dataset containing over 8k sketch-photo face pairs.
- · Developed an ANN model for mapping examples in a weak modality (sketch) to examples in a stronger modality (photo) by inferring the conditional distribution of a semantic representation in the strong modality given an example from the weak modality using GANs.
- · Manuascript can be found here, and suplementary materials can be found here..

Chinese Academy of Sciences, National Laboratory of Pattern Recognition

Research Assistant (Principal Investigator: Ran He)

- · Investigated the role of identity-preserving transformation in cross-modality face retrieval.
- · Designed and implemented a human-like Artificial Neural Network (ANN) architecture where a global encoder-decoder network and four local patch networks work jointly to perceive both global structures and local details of faces.

Outreach

2017

2017

2021

Gave a talk on Bayesian reasoning and program synthesis to high school students in Pathways2AI.

Skills

Modelling and Analysis: Python, PyTorch, Julia, Gen, R, MATLAB, C++

Experimental Design: JavaScript, HTML, CSS Software and Tools: git, Adobe CC, LATEX
